QUALITY FABRICS | BETTER TOMORROW

QUALITY • TRANSPARENCY • RELIABILITY • GLOBAL SOURCING

YOUR TRUSTED GLOBAL SOURCING PARTNER

Connecting Buyers with the Right Manufacturers

FROM SMALL VOLUME TO LARGE SCALE | FROM FIBER TO GARMENT

01 | ABOUT SAGAS

Connecting buyers with capable manufacturing partners

Sri Angalamman Garments Apparel Sourcing (SAGAS) is a professional apparel sourcing and coordination company based in Tiruppur, Tamil Nadu. We help buyers identify the right manufacturing route for their product, quality, quantity, price and delivery requirements.

Our approach goes beyond simply locating a factory. We evaluate the practical fit between the buyer requirement and the manufacturing partner: product specialization, production capacity, technical capability, quality expectations, commercial competitiveness, delivery timeline and applicable compliance needs.

OUR FOUR PILLARS

QUALITY

Product and workmanship ali parameters.

TRANSPARENCY

Clear communication across production.

RELIABILITY

Consistent follow-up and deli coordination.

GLOBAL SOURCING

Connecting buyers to suitable manufac capabilities.

02 | MANUFACTURING NETWORK

50-machine to 500-machine partner range

Through our established factory relationships, SAGAS can support programs ranging from partners operating approximately 50 machines to partners operating approximately 500 machines. This breadth allows us to consider production routes for smaller volumes, growing programs and larger-scale requirements.

The objective is not to push every order into the largest facility. We match the order to the appropriate manufacturing scale, product capability and timeline so that capacity is practical for the buyer.

SMALL VOLUME

Focused production routes for smaller programs.

GROWING VOLUME

Flexible capacity for repeat programs a

LARGE VOLUME

Higher-capacity partners for substantial production re

RIGHT FACTORY + RIGHT CAPACITY + RIGHT PRODUCT = BETTER EXECUTION

03 | VERTICAL SOURCING

Integrated sourcing can create commercial and operational advantages

SAGAS also has relationships with selected vertical-based manufacturing partners. Depending on the product and program, the supply route can be coordinated across multiple stages—from fiber or yarn through textile processing and fabric, then garment manufacturing and shipment.

When the supply chain is integrated appropriately, fewer hand-offs can improve coordination and traceability. It can also create opportunities for competitive costing because key stages can be planned together, while maintaining the buyer's required quality parameters.

01 FIBER / YARN

Raw-material route aligned to

02 FABRIC

Knitting/weaving, dyeing and coordination.

03 GARMENT

Cutting, sewing, finishing and

04 DELIVERY

Packing, documentation and shipment

FROM FIBER TO GARMENT DELIVERY — ONE COORDINATED SOURCING ROUTE

04 | COST & VALUE

Commercially competitive routes built around quality requirements

SAGAS looks at total supply-chain economics rather than garment stitching price alone. We consider the fabric route, order quantity, factory scale, process integration, production efficiency, logistics and the buyer's required quality level.

Our vertical and specialized partner relationships can provide opportunities to build competitive costing, particularly when textile and garment stages can be planned together. The aim is a balanced solution across price, quality, lead time, capacity and reliability.

RIGHT FACTORY

Avoid unnecessary overhead by matc

RIGHT SUPPLY ROUTE

Use integrated or specialized partners suitable.

RIGHT QUALITY

Cost decisions remain linked to agreed buyer quality

VALUE = RIGHT PRODUCT + RIGHT QUALITY + RIGHT FACTORY + RIGHT COST + RIGHT DELIVERY

05 | OUR SERVICES

One coordinated interface from product development to shipment

SAGAS is structured to support the buyer across the key stages of an apparel sourcing program. Our teams coordinate with factories and specialist partners so that product, commercial, quality and delivery requirements remain connected.

PRODUCTION COORDINATION

Production tracking, factory follow-up, status communication a

LOGISTICS & SHIPMENT

Packing, documentation, shipment planning and delivery follow-up.

06 | QUALITY & COMPLIANCE

Buyer-specific quality, social and compliance requirements

Quality and compliance are central to responsible apparel sourcing. SAGAS works with manufacturing partners according to the buyer's stated requirements and supports coordination around product quality, factory capability, social responsibility, ethical production, safety and applicable customer standards.

COMPLIANCE & BUYER STANDARDS

Our manufacturing partner network can support programs requiring recognized social, sustainability and product standards.

SEDEX / SMETA	WRAP	BETTER COTTON (BCI)	DISNEY FAMA
OEKO-TEX®	GOTS	GRS	ISO / SA8000

NOTE: Certification, audit and authorization status is verified for the relevant manufacturing partner and production scope before use.

PRODUCT QUALITY

Specifications, measurements, workma
inspection expectations.

SOCIAL RESPONSIBILITY

Factory practices considered against a
requirements.

ENVIRONMENTAL FOCUS

Where required, sourcing can consider applicable en
sustainable-production expectations.

Compliance requirements vary by buyer, market and product. SAGAS will align the manufacturing route with the certifications, audits, testing, restricted-substance requirements and other standards specifically required for the order. We do not claim a certification unless it has been verified for the relevant manufacturing partner and production scope.

07 | OUR TEAM

Experienced technical and commercial coordination

Our strength comes from cross-functional coordination. SAGAS brings together technical, quality, merchandising, production, design and logistics expertise so that buyers have a coordinated sourcing interface rather than disconnected communication.
